

Installing MPD16 Utility

1. Double-click on the Installer icon inside the Utility folder on the CD-ROM to start the installer.
2. Click on “Continue” in the Install Wizard window.
3. Click on “Agree” in the User License Agreement screen, if you agree with the contents and to proceed installation.
4. Click on “Yes” on the prompt window to continue installation.
5. After the installation is completed and the complete screen appeared, click on “Restart” to quit and restart the system.
6. The MPD16 Utilities folder has been created on the desktop.

Installing USB Driver

The USB Driver is installed inside the Extension folder automatically when the MPD16 Utility Installer is executed.

System requirement

Macintosh equipped with USB port as standard

OS: 9.0, 9.1 and 9.2*

Disk: 2MB or more disk space

Display resolution: 800 x 600/256 colors or more

- * The Mac OS X and the classic mode of Mac OS X are not supported. Boot up the system with Mac OS 9.x first to use the MPD16.
